

AI-Enabled UI/UX Design

Timeless Design Fundamentals Augmented by AI Workflows

Where strategic design meets artificial intelligence. A 4-month portfolio-first program built to train the next generation of product designers. Learn research, interaction, visual systems, and prototyping, blended natively with AI tools that are reshaping the industry. You leave with 4 case studies, a guided internship, and a verified professional certificate.

4 Months

DURATION

96+ Hrs

LIVE CLASSES

STUDIES

1 Month

INTERNSHIP

WHO IS THIS COURSE FOR?

Aspiring Designers

CAREER TRANSITION

Individuals looking to transition into tech product design roles and build a competitive portfolio from scratch.

Creatives & Devs

SKILL EXPANSION

Graphic designers, marketers, and developers looking to expand their skill sets into comprehensive UI/UX frameworks.

Founders & PMs

BUILD & PROTOTYPE

Entrepreneurs who want to design their own MVPs and working professionals seeking AI-fluent product design workflows.

CORE LEARNING OUTCOMES

- Conduct User Research:** Master user interviews, surveys, usability tests, and affinity synthesis.
- Design End-to-End Flows:** Construct seamless interaction flows, from early sitemaps to high-fidelity prototypes.
- Build Design Systems:** Implement scalable variables, components, nested layouts, and token spacing in Figma.
- Leverage AI Tools:** Integrate Midjourney, Galileo AI, v0, and Claude for ideation, content, and code handoff.
- Deliver Real Client Work:** Apply training to live briefs and ship portfolio-grade outcomes in the 4-week internship.

Pedagogy & Curriculum Phases

Structured monthly learning containing portfolio deliverables, guided by live studio practice

DESIGN • AI • PORTFOLIO

MONTH
01**Design Foundations**

Visual Literacy, Research & Discovery

Topics: Design thinking frameworks (Double Diamond), qualitative/quantitative research, user interviews, affinity mapping, Gestalt principles, typography, grid systems, and color theory.

Tools & AI: Figma, FigJam, Notion, Maze, Dovetail, Otter.ai, ChatGPT/Claude (transcript synthesis), Midjourney (mood boards).

Month 1 Deliverable: **Portfolio Case Study #1** — End-to-end research and discovery report for a chosen problem space, documented as a Notion case study.

MONTH
02**Interaction & Interface Design**

Figma Mastery, Systems & Accessibility

Topics: Information architecture, low/mid-fidelity wireframing, auto layout, component properties, variables & modes (light/dark theme switching), micro-interactions, conditional prototyping, and WCAG accessibility standards.

Tools & AI: Figma (advanced), Tokens Studio, Uizard, Rive, Lottie, Stark/Able, Whimsical, Galileo AI (prompt-to-wireframe).

Month 2 Deliverable: **Portfolio Case Study #2** — Fully prototyped mobile or web app with a documented mini design system, accessibility audit, and usability testing.

Curriculum Phases (Continued)

AI-augmented design sprints followed by a month-long real-world internship

MONTH
03**AI-Augmented Design Sprints**

Prompt Engineering, Chat & Agent Us

Topics: Prompt engineering for designers (structured chaining, few-shot), UX writing with AI, UI generation, designing for AI-native features (chat interfaces, agentic patterns, empty states, human-in-the-loop), and design-to-code pipelines.

Tools & AI: Galileo AI, v0 by Vercel, Claude Projects/Custom GPTs, Midjourney/Firefly, Spline AI (3D), Anima/Locofy, Cursor.

Month 3 Deliverable: **Portfolio Case Study #3** — An AI-native product feature designed end-to-end (chat UI, agents, and RAG pipelines) with reflection on AI acceleration.

MONTH
04**Guided UI/UX Design Internship**

Real Client Brief, Feedback & Handoff

Structure: 4-week active placement with a startup partner or real client brief. Run daily standups and weekly sprint reviews with active industry designers.

Deliverables: High-fidelity screens, validated user flows, interactive prototypes, sitemaps, developer handoff package (tokens, specs, code components), and a live Demo Day presentation.

Month 4 Deliverable: **Portfolio Case Study #4 + Verified Internship Certificate** signed by the partner organization.

Complete Tools Stack

Every tool taught in context — through real studio briefs, not isolated exercises

TECHNOLOGY STACK

WEEKLY LEARNING RHYTHM — 10-16 HRS / WEEK

DAYS	FORMAT	ACTIVITIES	TIME
Saturday	LIVE	Instructor unpacking concepts, live tool walkthroughs, demos, real-world examples, Q&A.	3 hrs
Sunday	LIVE	Hands-on studio session — peer critique, live design reviews, finalising deliverables.	3 hrs
Mon – Fri	LMS / Async	Self-paced recorded lessons, readings, warm-up exercises, mentor support on Slack.	8-10 hrs

COMMUNITY & MENTORSHIP

- 1:1 Mentor Check-ins:** Weekly feedback on your active project, helping you refine case study deliverables.
- Studio Peer Critique:** Live interactive review sessions every Sunday to simulate industry design reviews.
- Loom Feedback:** Mentors review your case study submissions and record video walk-through comments.
- Demo Day:** Present your internship case study to a panel of startup partners, recruiters, and managers.

ASSESSMENT WEIGHTS

COMPONENT	WEIGHT	WHAT'S EVALUATED
Weekly LMS Exercises	15%	Completion of recorded-video lessons and weekly warm-ups.
Live Session Participation	10%	Engagement and design critique contributions during studio hours.
Phase Deliverables (Months 1-3)	30%	Depth, originality, and documentation quality of case studies 1, 2 & 3.
Internship Performance	30%	Mentor ratings on design craft, communication, and delivery metrics.
Final Portfolio Review	15%	Case study structure, layout, presentation, and overall hireability.

PROGRAM INVESTMENT

COMPLETE 4-MONTH PROGRAM

▲ Early Bird Offer: Valid for First 50 Members Only

■ 2 Installments Payment Option Available

₹30,000

 ₹50,000

Early Enrollment Discount • Active • Flexible EMI Options Available

- ✓ All Live weekend studio sessions (96+ Hours)
- ✓ 1-Month Guided Internship & MAANG Mentors Support
- ✓ Professional Certification & GitHub/(Behance/Figma) Portfolio Setup
- ✓ Career Acceleration (Resume, Portfolio, mock interviews)

STUDENT TESTIMONIALS

★★★★★

"I transitioned from graphic design to tech products in just 4 months at Kayalas Academy. The hands-on portfolio case studies and rigorous live feedback sessions gave me the confidence to design complex interfaces from scratch."

N

Nikhil Dasal
Graphic Designer → UI/UX Product Designer

★★★★★

"As a founder, I was tired of outsourcing my vision. This program at Kayalas Academy taught me how to wireframe and design our own MVPs using tools like Figma and AI ideation. Our new user flows have doubled our conversion rate."

A

Ayesha Khan
Product & CEO, Bangalore

★★★★★

"I knew how to code but my interfaces always looked amateur. The modules on visual hierarchy, typography, and auto layout at Kayalas Academy transformed the way I build components. The internship was the cherry on top."

V

Vikram Singh
Frontend Dev → UI Engineer

★★★★★

"The deep dive into user psychology and AI-assisted synthesis at Kayalas Academy shifted my career trajectory. I went from analyzing marketing funnels to conducting full-scale UX research for a SaaS startup."

P

Pooja Reddy
Marketing → UX Researcher

**Ready to start building?**

Join the 2026 Edition. No prior UI/UX or design experience required. A laptop with 8GB+ RAM is all you need.
